

GAS PLANT ACCOUNTING

A 1-day Program

Up to 8 hours of CPE Credit are awarded

Who Should Attend:

- New or experienced employees that
 - work for service producers involved in the production of natural gas
 - work in gas plant operations
 - need to account for gas plant operations
 - financially evaluate gas plants for acquisition or divestiture
 - are involved with the sale of natural gas and plant products

Prerequisites:

- You should be an accountant, at least by training – **and** -
- Have a basic understanding of oil and gas terminology and energy industry processes and procedures

Advance Preparation: None

Program Level: Basic

Delivery Method: Group Live, Group Internet

Based Field of Study: Accounting

Upon Completion of this Program Participants will be able to:

- Trace the flow of natural gas through a plant
- Calculate netback pricing for each product in a gas plant
- Account for the money generated by the products in a gas plant
- Calculate the ownership interest of the various products going through a gas plant
- Relate gas plant expenses to revenue
- Understand and describe the physical operation of a gas plant

Key Topics Covered:

- Why gas is processed - NGL product value versus gas value; gas cleanup so that the gas meets pipeline specifications
- How gas is processed - general discussion of gas plant processing; evolution of gas processing from absorption to cryogenic plants
- An overview of gas plant allocations - calculation of theoretical NGL volumes based on product GPM; calculation of theoretical residue gas remaining; allocation of NGL's and residue gas based on theoretical volumes
- Gas plant agreements - purchase agreements; processing agreement
- Gas plant accounting – examples; class problems
